Check out these new enrichments this fall!

Mouse Squad (4th and 5th Grade)

Are you ready to go green? In GreenTECH, you'll learn where electricity comes from, about the technology that's brought us this far into our future, and start to think about what comes next. You'll build handheld generators, design batteries, convert electronics to run on solar power and teach others how to get greener about energy!

Martial Arts (Kinder-2nd)

Martial Arts class focuses on a variety of skills and areas of personal growth, such as self defense, personal discipline, respect for others and physical

Play Rugby (3rd-5th)

Rugby For Good is our grassroots, base level rugby program that specifically uses rugby as a vehicle for social inclusion and youth development. The majority of our program partners work with us through the Rugby For Good model. We utilize an asset-based approach, combining rugby with sports & health education, mentoring, and tutoring. We empower young people to develop 4 C's:

Oceans After School

Are you interested in marine life? Do you enjoy science? Come join us in exploring our oceans, animals, bacteria, and many other hand on adventures.

Y Makers (Kinder-5th)

YMakers puts tools in kids hands and ideas in their heads. Each day your child will get hands-on experience with basic woodworking and crafting tools while they build and make whatever they can dream up! Responsible, mature and SAFE Making are at the foundation of everything we do, so we open each session with practices that introduce and ingrain lifelong safety habits in our builders. Past participant projects have included toys and games, gifts for others, home decor, tables and chairs, shelves for school lockers, door signs, pencil holders, tiny beds for stuffed animals, and much much more! We are working to develop YMakers into a permanent program at the Y, and your child can help by putting their hands and minds to work building up our workshop!
